

Factorial!

Homework 4

Due: Friday 14th March, 10am (start of class)

- Write a JavaScript and HTML program that accepts a number via an entry box, and shows the factorial of that number.
- You should dynamically updating the result on every keypress.
- You are to write the HTML and JavaScript yourself.
- You can *not* use the chalk library, but you can *take* anything from the class notes, and/or the chalk library.
- Print out your JavaScript file and HTML file, and bring it to class on the 14th (this can be one piece of paper, if you wish).
